0-intro

Title

- ☑ 0: Introducing C

Intro.

- ☑ 25% vs. 75%; 10% vs. 90%

git/github

- git/github
- New => Project... (Demo)
- New => Project from Version Control...
- licence
- .gitignore

hello.c

- hello world
- gcc
  - clang
- comment
  - //: single-line comments
  - /* */: multiple-line comments
  - /** */: docs comments
- preprocessor directives
  - gcc -E hello.c
- function
  - main
    - return 0
    - int
    - void
  - printf
    - string literal
- statement
  - ;

cmake

- cmake (just make it working)
- cmake (explained line by line)

git/github (again)

- cmake.gitignore

- `jetbrains.gitignore`
- `add, commit, push`

`guess.c`

- play with it
- programming with natural language in comments
- input
  - `printf`
    - long string concatenation
- `if`
- `while`
- data
- operation
- output

`git/github` (again)

- `add, commit, push`

Clion Plugin

- SonarLint
- tabnine
- IdeaVim
- wakatime

Code Style (Highly Recommended!!!)

- Clion Code Style (google)
  - `Settings` => `Code Style` => `C/C++`
- Action on Save (CLion)
  - `Settings` => `Action on Save`
